5. Original RES Generator/CHP application MRA/REWS reference number: _____

If an Enemalta "No Objection" letter was required in the original application, please provide an updated recent Enemalta "No Objection" letter relevant to the change being requested.

6. Address of original Installation

Address: _____

_____

_____

Town / City: _____ **Postcode:** _____

ARMS Ltd Account No. of the original site:

_____

(found on the ARMS Ltd. bill statement of original installation)

7. Requested Change(s): (Tick any of the relevant boxes, and provide the complementary forms if requested)

a) **Change of account holder** ☐ **-** *Please submit also the application form "Transfer of Electricity Generation License" duly filled and signed by both original and new account holder. Note that in the case of a PV installation allocated a feed-in tariff under the Feed-In Tariffs Scheme (Electricity Generated from Solar Photovoltaic Installations) Regulations, 2015 (S.L. 545. 27) such transfer is only allowed once an application for connection to the grid is submitted to the ARMS Ltd . This to safeguard the eligibility for the payment of the feed-in tariff of the new owner/account holder*

b) **Change of premises type**: (*Note : The REWS is only confirming or otherwise eligible for an existing feed-in tariff/grant in case of change of premises type and not the change of premises per se which is the remit of Enemalta plc & ARMS Ltd.)*

- **i.** *FROM* **Residential/Domestic** *TO* **Non-Residential/Institutional Households** ☐
- **ii.** *FROM* **Non-Residential/Institutional Households** *TO* **Residential/Domestic** ☐

c) **Change of installation address / connection point** ☐ *- Please submit also a revised " Notification Application" or " Authorisation Application" request form, as applicable and including any revised Planning Authority clearances (if applicable)*

d) **Shifting and add-on** ☐ *- request to transfer an existing PV installation from a dedicated meter and connect it to another existing PV installation connected on the consumption meter and account. (Note: This option is suggested only when the feed-in tariff of any of the two PVs expires; only one FiT arrangement will apply. The payment of the feed-in tariff would be capped to the KWp of that PV system still with a valid feed-in tariff capacity and such case generation primarily for own consumption may be the most economically convenient option)*
